stackoverflow.com/users/2869055
Warsaw, PL · UTC+1

Software architect and co-founder of DevMentors.io, staff engineer at EcoVadis. 12+ years in IT across development, architecture and technical leadership — enterprise-scale platforms (health care, sustainability ratings) as well as small product teams and game development. Event-driven, decomposed systems, Domain-Driven Design from strategy to tactics, and the legacy modernisation nobody volunteers for. Co-author of three flagship .NET courses.

01 / EXPERIENCE

Software Architect & co-founder · DevMentors.io

2023 – NOW

Co-founder and board member. Architecture consulting, expert trainings and online courses for .NET teams across Poland; co-author of three flagship courses.

EDUCATION · CONSULTING

Staff Engineer · Tech Lead · EcoVadis (via Pragmile)

JAN 2022 – NOW

Co-leading a .NET/Azure team: architecture, backend (.NET 6 → current), SQL Server, Azure Service Bus, some React, all cloud-hosted on AKS. DevOps Ambassador for CI/CD and infra automation. Unit, integration and load testing; analysis, documentation, mentoring and technical recruitment.

ENTERPRISE · SUSTAINABILITY & CSR RATINGS

Senior .NET Developer · LUX MED

MAR 2018 – DEC 2021

Led development in a small .NET team and owned technical architecture. Frontend (ExtJS/Angular), backend (.NET Framework and .NET Core), SQL Server, messaging (RabbitMQ, NServiceBus), ETL (SSIS). Evaluated and introduced new technologies company-wide; ran estimation, scope and negotiation for development initiatives.

ENTERPRISE · HEALTH CARE

.NET Developer · LUX MED

OCT 2016 – FEB 2018

Customer and patient service, product management and finance domains. Full-stack .NET delivery plus unit, integration, load and GUI testing (NUnit, xUnit, Taurus/JMeter, Selenium).

ENTERPRISE · HEALTH CARE

C# / Unity3D Developer · Pixelated Milk

SEP 2015 – SEP 2016

Game modules and internal tooling in C#/Unity3D, UI prototyping, plus web frontend and ASP.NET MVC/Azure backend work.

STARTUP · GAME DEVELOPMENT

.NET Developer · NAU S.A.

MAY 2015 – AUG 2015

Razor/jQuery frontend, ASP.NET MVC backend, SQL Server, unit testing and technical analysis.

EDUCATION · SCHOOL & STUDENT MANAGEMENT

Junior MS Dynamics Consultant · Outbox

MAR 2015 – MAY 2015

JavaScript/jQuery frontend and C#/WWF backend development on CRM implementations.

CONSULTING · CRM

02 / SELECTED PROJECTS & ACHIEVEMENTS

First team-owned, fully independent microservice

ECOVADIS

Architected and led development of the service connecting users of monolithic legacy applications (backoffice and the main SaaS product) with a new Tableau-based BI solution — battle-testing the organisation's replatforming effort and setting the pattern for autonomous, resilient services.

PROVED THE REPLATFORMING PATH FOR THE ORG

RBAC access-control platform (ACL)

ECOVADIS

Co-architected and built a role-based access control solution flexible enough to model access across current and planned products, under rigorous performance requirements, with an automated path for other teams to protect their own resources.

CROSS-PRODUCT · STRICT PERFORMANCE BUDGET

Modular multi-tenant patient portal

LUX MED

Co-architected (owning technical architecture) and led development of the portal that moved new-patient data handling from manual work by LUX MED staff to clients' HR departments and, later, the employees themselves. It halted headcount growth in customer service and became a main selling point in contract renegotiations and new-client acquisition.

0.5M+ BUSINESS OPERATIONS IN 2 YRS · 1000+ DAILY USERS · ~150K REQ/DAY

Platform modernisation & event-driven rearchitecture

LUX MED

Led evaluation and rollout of the move from WCF/ExtJS to ASP.NET Core, .NET Core, RabbitMQ, Hangfire and Angular 4+, with independent vertically-sliced services connected by events — from development practices to operations and CI/CD. Also built culture: knowledge-sharing, documenting in public, planning for failure, safe-to-fail teams.

COMPANY-WIDE TECH STACK SHIFT

Regalia: Of Men and Monarchs — game systems

PIXELATED MILK

Co-designed and built locations, travel, quest, banter, time-flow, NPC scheduling, requirements, crafting, shopping, party, notification and loot modules — each with authoring tools so designers and testers could build the game world without developer support.
